The Way

The Butterfly Effect

Close your eyes so you can't see
As you climb down with me
Take my hand don't walk alone
Where it stops I don't knowIt's all right with me
Savior insultThose who suffer
Those who care
Those who linger
Anywhere at allTake a minute
Discover
Why you need
No otherIt's all right with me
Don't be selfishThose who suffered
Those who cared
Those lingered
Anywhere at allThat's how it is
That's how it used to be
No one waiting there for me
That's how it is
That's how we used to be
That's how it was and always will beThe way we were
That's how we used to be
How it was and always will be
