

# Halftime

## Amy Winehouse

Simple sweet guitar, humbled by the bass

So when the beat kicks in

Everything falls into place

And it overpowers me

I can't help but dance

You can try to stop me now

But you won't get the chance

[Chorus]Half time

Time to make it through

Consider the change

See it from a different view

Half time

Time to think it through

Consider the change

Rhythm floods my heart

The melody it feeds my soul

The tune tears me apart

And it swallows me whole

You should thank your lucky stars

Cause the music is a gift

And it's stronger than all else

Provides me with a bliss

[Chorus]Half time

Time to make it through

Consider the change

See it from a different view

Half time

Time to think it through

Consider the change

My lyrics reveling

Some natural vibe

It's a kind of laid back feeling

Oh just let it ride

And when Frank Sinatra Sings

It's too much to take

So I sing the standard shit

It pacifies my ache

[Chorus]Half time

Time to make it through  
Consider the change  
See it from a different view  
Half time  
Time to think it through  
Consider the change
