Meteor

Boaz Sharabi

Hearts all around my feet
Don't you ever sweep the street
If they still can keep a beat
Hands holding other hands
I'm a girl and you're a man
Do you know what's moving me?
One night a meteor came to my door
And he asked me to dance
One night a shooting star
He traveled far just to ask me to dance
Arms give away your need
Tie them up and around me
And play me as you please
Dance, nothing left to spare
Fill it up with all your air
You're the one I want to see
One night a meteor came to my door
And he asked me to dance
One night a shooting star
He traveled far just to ask me to dance
One night a meteor came to my door
And he asked me to dance
One night a shooting star
He traveled far just to ask me to dance
