

# Meteor

**Boaz Sharabi**

Hearts all around my feet  
Don't you ever sweep the street  
If they still can keep a beat  
Hands holding other hands  
I'm a girl and you're a man  
Do you know what's moving me?  
One night a meteor came to my door  
And he asked me to dance  
One night a shooting star  
He traveled far just to ask me to dance  
Arms give away your need  
Tie them up and around me  
And play me as you please  
Dance, nothing left to spare  
Fill it up with all your air  
You're the one I want to see  
One night a meteor came to my door  
And he asked me to dance  
One night a shooting star  
He traveled far just to ask me to dance  
One night a meteor came to my door  
And he asked me to dance  
One night a shooting star  
He traveled far just to ask me to dance
