## Ataulfo Alves

I saw her standing there  
Red fire in her hair  
She knows I can't resist  
The poison from her lips  
I never wanted it, I tried to run from it  
Temptation stares me down  
She sings when she is sad  
She laughs when she is mad  
The lonely heart club cry  
I hear them through the night  
I never wanted it, I tried to run from it

Temptation wears me down  
Heaven can wait  
Heaven can wait for me now  
Leave open the gate  
Hell is the game I want now, I'm coming down  
She leaves me wanting more  
White flowers on the shore  
She knows I can't resist  
The poison from her lips  
The poison from her lips  
She knows I can't resist
