

Levitation

Monkeywrench

In the darkness I will shine
Cast no shadows or define
Walk on water, float on air

There is no other to compare
I have this fascination, no cause for deviation
It's called levitation, levitation, levitation
There's no cause to start and scream

Nor rub your eyes, this is no dream
Although I sit upon this chair

I rise and float up in the air
I have this fascination, no cause for deviation
It's called levitation, levitation, levitation
Magnetic force, repel, attract

Once it starts, there's no turning back
I offer you this chance to learn

Take it now, there's no return
I have this fascination, no cause for deviation
It's called levitation, levitation, levitation
Magnetic force, repel, attract

Once it starts, there's no turning back
I offer you a chance to learn

Take it now, there's no return
I have this fascination, no cause for deviation
It's called levitation, levitation, levitation
