

# Original

## Silage

Let's get lost in an original sound  
I heard a band that was better than the last one around  
So take my time, my line, my beat down I serve a God that doesn't judge me  
By a new sound okay, honestly, it's coming too easy  
I'm making' up an old used verse, chorus, key  
This has not been done before, this hasn't been done before That's it, get down, we're lookin' for some new  
ground  
Gotta break through with a break through  
New sound and that won't happen  
'Cause it's time to get down here's the tune, where's the truth Inside, we found, it's almost, it's almost  
It's almost, it's almost, it's almost over  
And I haven't said a word yet  
That hasn't been done before, this hasn't been done before Breakdown gotta have a breakdown  
Build it up back to the verse and  
It's alright to write a song that  
Sounds like everyone else's song So let's get lost in an original sound  
I heard a band that was better  
Than the last one around  
This hasn't been done before, this hasn't been done before
