Incarnadine

Nothingface

Shut up.....stop talking
I got it all figured out this time
Don't worry
They'll never take us out aliveThe endless trial
Convicting all
But it's us now
We got controlIf you can't talk
Then I can't hear
And that's why we're locked in the dark
If I knew what you were from the start
Fighting would never be hard
Now we're drooling to tear you apart
Destroying all that you areLet's start the big event
10 seconds of blind amusement
The public execution
So come on lets all feel the hate
I feel it....yeah!
But I'm coming back for more
Excitement....yeah!
Stop fucking the world to death....
You need it.....yeah!
I'll kill us all right now....
For this.....yeah!
Cannot stop the rageI know the lie
A photographs a knife
A question
A path that leads nowhereI search inside myself
To find a place, sometimes safe
And if I find that place
I can finally rest and stop asking aboutThe know
The how
The where
The reasons competingThe way
The why
The you
The why
The reasons believingAnd I know the faith
The god
The waste

The lying it's breathingAnd I know the face
The man
The hate
The anger it's seethingThe parasite
Behind my eyes
Controls my mind
And feeds on time
So I'll hide inside
And wait until it's overThe nothingness is vicoden
It felt so good to find an end
Nothing lasts when I am
Drowning for this
Killing for this
I can't stop thinking
I can't stop thinking aboutIt's just fine
And we'll be alright
While we can find
Our way to the endless light, yeah!And tonight it all turns black again
So you can hide inside your fucking mind
And cry because you're still aliveBut it will never end
Don't hold your mother fucking breath
Embrace your lonely selfishness
Cause you will never knowThe know
The how
The where
The reasons competingThe know the face
The man
The hate
The anger it's seething
