Think About It

Corrupted Morals

There's a picture in my mind
I can't get out
I can see so clear and bright
Kinda like the sunshine shining through the clouds
Imagine for a moment
Everybody happy smiling, everybody everywhere
Imagine for a moment
Nobody ever has a worry, nobody has a care
This big old world is spinning 'round
And there's not a solitary teardrop falling down
Think about it, think about it
Everybody come on and think about it
Think about it, think about it
Everybody come on and think about that
I walked along the water
Looked out in the ocean just as far as my eyes could see
And I began to wonder
Is there really any reason why this picture that I'm seeing
Couldn't be, couldn't be reality
If only everybody saw things the way I see
Imagine for a moment
Everybody happy smiling, everybody everywhere
Imagine for a moment
Nobody ever has a worry, nobody has a care
This big old world is spinning 'round
And there's not a solitary teardrop falling down
Think about it, think about it
Everybody come on and think about it
Think about it, think about it
Everybody come on and think about that
Think about it, think about it
Everybody come on and think about it
Come on, come on, come on, come on
Come on, come on, come on, come on
Everybody come on and think about that
Come on and think about, come on and think about that
Come on and think about that
Come on, think about it
Come on, think about it

Come on, think about it
Come on, think about it
Come on, think about it
Come on, think about it
Come on, think about it
