Flows

Ishyua

Its getting higher when all the world is around it
is getting worst at night if you keep remind it
let the river flows thats what i can deny about it
all the lipsticks on and you can go around

Everywhere of the mind when all these years
come late at night come late at night

Give yourself through this moment
get everything you want it now
when all the nights just broke down
get all the gift room for nothing

Its getting higher when all the world is around it
is getting worst at night if you keep remind it
let the river flows thats what i can deny about it
all the lipsticks on and you can go around

Everywhere out of time when im taking all these years
to late at night to late at night

Give yourself through this moment
get everhything you want it now
when all the nights just broke down
get all the gift room for nothing for nothing
Â´till they go down
