

Quintessence

Mastodon

The demon skin is covered
In fine mist
Opened his hand in my hand
Holding my eyes to the future Hovering above myself
Letting loose the guided
Punching these holes in my head
The space time paradigm Omnipresence
Primal instincts Let it go, let it go, let it go
Let it go, let it go Calling reason, finding you
These wild hearts run
Even deeper, burning through
These wild hearts run Let it go, let it go, let it go
Let it go, let it go Letting me free the quintessence
In fine mist
Opened his hand in center
Holding my eyes to the future Hovering above myself
Letting loose the guided
Punching these holes in my head
Losing my skin to the landslide Omnipresence
Primal instinct Let it go, let it go, let it go
Let it go, let it go Calling reason, finding you
These wild hearts run
Even deeper, burning through
These wild hearts run Let it go, let it go, let it go
Let it go, let it go Shield failure
Speed farewell
Shield failure
Speed farewell
