Your Presence

By The Tree

It's funny how You say my name
Like a thought in motion love
Is not a game that can be played
It's crazy how You read my mind
Like a twisted thought of reasoning
Your words are so divineI want to be in Your presence
I want to be where You are
Come give me grace for this moment
I wanna be found where You areLooking for this promised land
My attempts they seem to fail
I'm sinking in this desert sand
I feel like Moses wandering around
Except that not like Him
I can not seem to find myself a cloudI want to be in Your presence
I want to be where You are
Come give me grace for this moment
I wanna be found where You areCome and start a fire and let me be your flame
I need to know that you are with me
Wanna hear you call my nameI want to be in Your presence
I want to be where You are
Come give me grace for this moment
I wanna be found where You areAnd I want to be in Your presence
I want to be where You are
Come give me grace for this moment
I wanna be found where You are
