

# Catholic Girls

## The Dangerous Summer

Even with the walls around me  
I always miss the place where I grew up  
it made us tough  
the simple love, and wealth, and families  
suicides, the kids who died too young  
It broke us up

I remember laughing when we caught up  
asking if that was still a part of me  
is it a part of me?  
at night we used to drive until we couldn't.  
all that we wanted was some company  
and it was comforting

I'll carry on into the world  
into the world  
Innocence is hard to stand by  
even with the catholic girls we loved  
when they gave it up  
life goes on

I remember laughing when we caught up  
asking if that was still a part of me  
is it a part of me?  
at night we used to drive until we couldn't  
all that we wanted was some company  
and it was comforting

visit with the Virden families  
Step inside the house where I found love  
I earned that cut  
Lori Anne I know you're out there  
watching us continue to grow up  
you cared too much  
life goes on

I remember laughing when we caught up  
asking if that was still a part of me  
is it a part of me?  
at night we used to drive until we couldn't.

all that we wanted was some company  
and it was comforting.

at night we used to drive until we couldn't  
all that you wanted was some company
