Emerald Sky

í Œí Œ

So we boarded up the windows
And we've taken down the lights
From the streets, I hear the echoes
Yeah, we're leaving town tonight
We don't need no medication
We've got all our vital signs
All this noise and light pollution
I just wanna see the stars tonight
We're gonna walk out of this city
Leaving everything behind
We can sleep the days
And cover ground at night
Until we find that emerald sky
Now there's plastic in the valley
There's still heartache in the ghetto
I need to talk to someone face to face
This place, no, it doesn't feel like home
We don't need no medication
We've got all our vital signs
All this noise and light pollution
I just wanna see the stars tonight
We're gonna walk out of this city
Leaving everything behind
We can sleep the days
And cover ground at night
Until we find that emerald sky
I'm gonna find that place that we forgot
Where I don't care about the money you've got
Where I don't need much 'cause it don't take a lot
We're gonna go
We're gonna walk out of this city
Leaving everything behind
We can sleep the days
And cover ground at night
Until we find that emerald sky
We're gonna walk out of this city
Leaving everything behind
We can sleep the days
And cover ground at night

I hope we find that emerald sky
Look up, look down, oh
From the heaven to the ground
Look up, look down, oh
From the heaven to the ground
Look up, look down, oh
From the heaven to the ground
Look up, look down, oh
From the heaven to the ground, oh
