

# Force Feedback

## Machinae Supremacy

Take a look across this vast uncharted battlefield  
You still don't know your enemy  
A bunch of pistol freaks with infinite mad skillz  
And a new found taste for blood We've made this land  
You have no place here  
No right This is the world you're in  
And this is where ours begins  
A borderless nation of thoughts to replace  
Your own inexistence in space We are not sleepers we hide in plain sight  
If you can't see you cannot fight  
This is the war between our culture and our hearts  
With millions born into the cause Now we're taking it back  
You don't believe me?  
Feedback This is the world you're in  
And this is where ours begins  
A borderless nation of thoughts to replace  
Your own inexistence in space I don't think you understand  
These are our shores and our land  
You are a stranger here  
And we won't be idle as you interfere This is the world you're in  
And this is where ours begins  
A borderless nation of thoughts to replace  
Your own inexistence in space Sure you already know  
That your age was long ago  
We augment reality online  
And you hail from ancient times This is the world you're in  
And this is where ours begins  
A borderless nation of thoughts to replace  
Your own inexistence in space
