Glory/us

Acceptance

Cold and wired, I've been fine
Everything you said to me goes well
Everything you said, that you said
Said you see right through me
Could be pulling you to me
Nothing seems to be working
Throwing on my intentions on the, on the
All turn in one
Honesty waits here forever
I've been undone
Glory and us come together
Beautiful is my picture
Throw it up in the spotlight
This setting seems to be working
Throwing all my intentions on the, on the
All turn in one
Honesty waits here forever
I've been undone
Glory and us come together
And I'll see this through
Everything you said before
And I'll see this through, oh oh
All tied in one
All tied in one
Everything changes the colors we see
(All turn in one)
Constant reminder of all that we should
Taking it back, turning around
(All turn in one)
Turning around
(Glory and us come to)
Everything changes the colors we see
(All turn in one)
Constant reminder of all that we should
(Honesty waits here forever)
Turning around, turning around
(I've been undone)
(Glory is waiting)
