

# City of Angels

## The Head and the Heart

Salt in a wound on a warm afternoon  
Sun is too bright so we wait for the night to find you  
To find you We'd get so high telling stories at night  
Was it a lie or maybe more like a dream Feels like a  
Feels like a I get a call at the station  
Man on the line; hesitation  
On the other line is just people takin' time  
From the people who have no more to give  
Alright And I know just where my heart should be  
Yeah I know just where my heart should be  
Yeah I know just where my heart should be In the city of angels  
The city of angels  
The city of Tell me one thing  
Just tell me what you see  
'Cause I have everything I want  
I have everything I need  
Right in front of me  
Yeah, she's right in front of me  
Yeah I know just where my heart should be  
Yeah I know just where my heart should be  
Yeah, she's right in front of me  
Yeah I know just where my heart should be  
In the city of angels  
In the city of angels  
The city of angels I've found a lot of love in this town everywhere I go  
But it never seems to stay and I've never seen it grow  
I found a lot of love in this town  
In the city of angels  
My heart should be  
Right here with you  
Right here with you  
In the city of angels I found a lot of love in this town everywhere I go  
And it never seems to stay and I've never seen it grow  
I've found a lot of love in this town  
In the city of angels Now I know just where my heart should be  
Yeah I know just where my heart should be  
Yeah I know just where my heart should be In the city of angels Everything I want's  
Everything I need's In the city of angels  
In the city of angels

In the city of angels
