Luminal

Covenant

I try to rise in pride, I want to radiate
Walk on water and ride the light
I try to break to chains, I want to penetrate
Cross the borders and drink the oceansGive me velocity and gasoline
Electricity and adrenaline
I want to be superluminalI need to burn my fuel, I want to detonate
Melt the sun and drain the sources
I need to waste my strength, I want to escalate
Turn the tide, conquer the starsGiven velocity and gasoline
Electricity and adrenaline
I want to be superluminalI have to go ahead, I want to elevate
Rise above, find the path, I have to look beyond
I want to perforate, reach behind, take it back
I must spread my wings, I want to scintillate
Bind myself, break away, I must be born again
I want to celebrate, stop the clock, never return
