

Better Together

Andrea Hamilton

Has anybody told you about the carrot and the pea
their hot and steamy love affair from ancient history

Romeo was buried deep inside the ground
while Juliet was hanging high and hoping to be found

How did it happen, who would've guessed
Better together better whenever we got each other I got you covered
No height that we can't climb when I'm with you it's always a good time
Have you ever wondered how it feels
to be

The sand without the sunshine or the wind without the trees?

Should be simple logic, two plus two is four

But sometimes when you add it up it equals something more
Better together better whenever we got each other I
got you covered

No height that we can't climb when I'm with you it's always a good time

The sky is bluer, everything's brighter easy to see that everything's lighter

Only the best ahead, always been said we're better together
You are the fun part of my day you're teaching my
heart a new way

Oh it's true that me and you are
boo boo boo... we're better together
