

Read All About It

Newsboys

I get my head together on a Saturday morning
a victim of the night it's called social action

I'm just trying to keep up with the times
moving with the crowd and they want it loud

I keep saying I'll never do it again
same old line I'm right back out there again.

Chorus

you can read all about it

you can read all about it

you can read all about it

you can read all about it my eyes catch the morning paper on the table

it's a brand new day but nothing's changed

sickness crime and poverty are the headlines that I see

there's got to be some good news someday Chorus my head's so much cleaner

it's a brand new morning

I can see the world through different eyes now

peace love and harmony

the Bible says these are for me

I thank God for the good news today
