

Figure It Out

Maroon 5

I'm happy you came to me first before the bubble burst
I'm happy you answered my calls, I'm bouncing off the walls
Impossible to be tamed, her need cellophane
I'm happy you like to play games, why did you run away? We could spend some time together
What he had he'll never know
Your boyfriend gives you no respect
And I can see you're getting it
So figure it out and let's go I'm happy you're so impulsive, means that you're passionate
I'm happy you're moving so fast but will it ever last?
I know you wanna break free from this monotony
I'm happy you're coming with me but by choice it's gotta be We can spend some time together
What he has he'll never know
Your boyfriend gives you no respect
And I can see you're getting it
So figure it out and let's go I'm happy you're changing your speed, slow down and lay with me
On bottom but always discrete, kneel down and kiss her feet
I'm happy you're going too far, full strength before we start
Sometimes you make it so hard, scream loud as we come apart We can spend some time together
What he had he'll never know
Your boyfriend gives you no respect
And I can see you're getting it
So figure it out and let's go We can spend some time together
What he has he'll never know
Your boyfriend gives you no respect
And I can see you're getting it
So figure it out and let's go
Figure it out and let's go
Figure it out and let's go
Figure it out and let's go
