

# The End Of Our Lives

[Andrew W.k.](#)

Had the power on full and a reason to run  
Learned a little bit slow but it's better than none  
Learned a little bit slow but at least we had fun  
Looking out on the lot, driving over the dance  
Riding up to the top, bringing lunch in advance  
Riding up to the top, bringing all that I can  
If you only do good and you figure it out  
If I do what I should, if I do it all now  
Don't be waiting for luck, find a way to do more  
Are we doing this? What are we doing this for?  
Because we can before the end of our lives  
The end of our lives, the end of our lives  
The end of our lives, before the end of our lives, oh  
There were days that I stole but I also got robbed  
So I made a mission my goal and a vision my job  
Made a mission my goal but the vision got lost  
If you only do good and you figure it out  
If I do what I should, if I do it all now  
Don't be waiting for luck, find a way to do more  
Are we doing this? What are we doing this for?  
To love the times we have, to like what makes us sad  
To live when others die, to lose and say goodbye  
To last until our moment comes but it isn't over, you know it isn't over  
You know it isn't over, you know it isn't over  
You know it isn't done before the end of our lives  
The end of our lives, the end of our lives  
The end of our lives, before the end of our lives, oh  
Just because this life ain't easy  
Doesn't make it bad, it isn't over  
It can't be over, be glad
