

# Days And Days

## Tegan And Sara

it must be something in the way you move  
it must be something in the way you look  
I'm not sure just yet  
must be something in the way you dream  
you just go home and the thirteen days  
inbetween you and I  
this is me before I come undone  
this is me before I fall apart  
I've been tired for days and days  
I've been tired for days and days  
it must be something in the way you move  
innocent like you gave in just  
like you always would  
it must be something in the way they say  
and the magic that you bring in  
between all you imply  
this is me before I come undone  
this is me before I fall apart  
I've been tired for days and days  
I've been tired for days and days  
it could have been a month or  
it could have been a year but I  
I gave up long before  
long before you cared  
her art inspired me to  
to do my best and  
to paint my music like  
like I saw it best and  
she says I grew up well  
well, well I grew up strong  
cause no one's got my back  
no one's gonna write me my songs  
it could have been a month or  
it could have been a year but I  
I gave up long before  
cause I've been tired for days and days  
I've been tired for days and days and days  
I've been tired for days and days and days  
I've been tired for days and days and days  
I've been tired for days and days and days  
it could have been a month or  
it could have been a year but I  
I gave up long before  
long before you cared  
her art inspired me to  
to do my best and  
to paint my music like

like I saw it best and  
she says I grew up well  
well, well I grew up strong  
cause no one's got my back  
no one's gonna write me my songsit could have been a month or  
it could have been a year but I  
I gave up long before  
cause I've been tired for days and days  
I've been tired for days and days and days  
I've been tired for days and days and days  
I've been tired for days and days and days  
I've been tired for days and days and days
