Reggie and the Full Effect

All I want to do, hanging on to you
It's all I want to do
Now you, now you'll run away
Hold on girl and stay, stay with me, with meSo how's my best friend, please don't let it end
Smile was sent to mend
Mend you, what won't go your way
Think out loud and stay, stay with me, with meIt's all the silly things to be holding on to this
Feels like a spell
And you'll know your mine if it's true
Only for you, only for you
