## Reggie and the Full Effect

All I want to do, hanging on to you  
It's all I want to do  
Now you, now you'll run away  
Hold on girl and stay, stay with me, with me So how's my best friend, please don't let it end  
Smile was sent to mend  
Mend you, what won't go your way  
Think out loud and stay, stay with me, with me It's all the silly things to be holding on to this  
Feels like a spell  
And you'll know your mine if it's true  
Only for you, only for you
