Distant Stars

LAKE

When it became a cause for alarm isn't clear
And nothing's come of it so far
But any day. The earth will shake
As light goes out from distant starsAnd who accepts of it is a fool for being used
The case will end as it's begunToo many people sleep with earplugs in their ears
How can their dreams be anything but fears
Let's open up. Refill the cup
And let our dreams be of the sunAnd who accepts of it is a fool for being used
The race will end as it's begun
