

Dream

Kevin Ross

They said a dream is just a dream
Until you wake up out your sleepV1:
All I seem to do is think about us
I'm missing you much babe
Sleeping without you is torturous
I'm just hoping that you feel the same
And it be crazy if you weren't
Like a hand on a flame, with no sign of pain
That be heartless
And is it wrong to hope you're hurt
Girl I won't be ashamed to lay here awake
As long as it's not in vainHook:
So don't make me dream
If I got what I want here in reality
Don't make me dream
Unless it will take me to where I wanna be
So don't make me dreamV2:
If I had to choose, money or love
Darling you know that
Be on the first flight straight to you
I'd give it all up, no hesitation
It's not a price on what you're worth
No matter how far away, how long it may take
For me to get there
So I'm off with no return
And I won't be ashamed to lay here awake
As long as it's not in vainHook:
So don't make me dream
If I got what I want here in reality
Don't make me dream
Unless it will take me to where I wanna be
So don't make me dreamRap Verse:
It's hard to sleep when the girl of your dreams a nightmare
Even harder waking up when I realize you're not there
Furthermore, understanding that there ain't no love without fear
Now I see what they say about life and how that sh*ts not fair
But I won't hold that against you
No, we won't dwell on that
Cuz all it takes is some effort to make a good thing last

Accepting the pain and pleasures
I am Usher with the Confessions
I am not letting it burn
No, I am just living and learning
See I just want you to see that it's deeper than love
May sound cliché but I feel like I breathe for this love
The crazy thing is it's not about how many breaths you take
But how many moments took your breath away
(Don't let me dream too long)Hook:
So don't make me dream
If I got what I want here in reality
Don't make me dream
Unless it will take me to where I wanna be
So don't make me dream
