Double Edge

Coptic Rain

[Verse: Sway]
Break
"Oo's" and "Ah's" , super swarve
But I see my matte black souped up super car,
Ever see that I?m ruthless and this one is a smash hit, goin' straight through the glass,
They ain?t catchin me ?cause I ain?t never runnin,
Sickened to my name and category, I ain?t number one-in,
Worst case scenario, is it will be a target,
The message stood a happy ending, I?m coming,
Come in and stop spying through a keyhole,
Wanna see me win this fight against evil,
The cowards are only preying on the weak,
I?ll have em on their knees in the long hall, cathedral,
Yea, am ahead of my job
They?re blowing it all the time but never when I flop,
Sway fever, but it?s like hay fever
Eyes are wide open whenever I drop.

[Chorus]
I?m a savior here to save you
I?m a problem too, frustrating you
I?m all night here to contain you
I?m the part that?s still in plain view [x2]

[Interlude]
For every action there is an equal and opposite reaction-

[Verse: P Money]
Oh shut up, I?ll introduce myself
(BRAP) (Grrr)
I?m flowing like a pitbull
I?ve the darkest punchlines in a fistful
I?m the show that the kids wanna watch
I?ve got the power to make them stay up late and miss school
Girls are like "Ahh he's cool"
Confusing nothing about me, simple
I?m a bad mother? shut your mouth
I?d stress the girls and give all the pretty ones wrinkles
I?m so great, flying around with no cape, I?m so baked

I graffiti my name on sky scrapers
Heroes tell me to stop, I?m like "Shut up, don't hate"
I use my power for entertainment from the mind the way I gave a girl an orgasm in home base
Why you gotta take my girl? Get your own date!
Why you here in my galaxy? Get your own space!

Savior here to save you
Progress to continue [x2]

I?m a savior here to save you
I?m a problem too, frustrate you
I?m all nightmare to contain you
I?m the part that?s still in plain view
