

# One Night

Christina Perri

I feel the way you want me.  
I see that you are lonely.  
If you could, I know you'd leave with me.  
It's more than curiosity.  
And I never longed for winter  
Your presence makes me shiver  
Untethered, you'd be better if you'd only come with me. One night I will be the moon,  
Hanging over you.  
(Spilling all over your body,  
Covering all your wounds).  
One night I will be the star,  
Falling where you are.  
(Somewhere in the deep of my love,  
Filling your empty heart).  
One night, one night, one night.  
One night, one night, one night. You've come so close to tasting,  
Now my innocence is breaking.  
Like the ocean in a perfect storm,  
It makes me want you even more.  
And I've never been so jealous,  
I've never felt so helpless,  
So out of breath and hungry for you. One night I will be the moon,  
Hanging over you.  
(Spilling all over your body,  
Covering all your wounds).  
One night I will be the star  
Falling where you are.  
(Somewhere in the deep of my love,  
Filling your empty heart).  
One night, one night, one night.  
One night, one night, one night. Hurry the sun is waking.  
Darling don't leave me waiting. One night I'll be the moon,  
Hanging over you.  
(Spilling all over your body,  
Covering all your wounds).  
One night I will be the star,  
Falling where you are.  
(Somewhere in the deep of my love,  
Filling your empty heart).

One night, one night, one night.  
One night, one night, one night.  
One night, one night, one night.  
One night, one night, one night.
