Electrified

SySF.

Light me up 'cause the night is only halfway through
You know I love to make some trouble with you
Flick my switch now smack my lips let's go
Got a fuse that's abused and I'm ready to blow
I start to slip into anticipation
Twisted fascination yeah
Over my head 'cause you're outta your mind
You've got me electrified
Every little thing and all the time
You've got me electrified, oh shock me, oh baby
It might be wrong
Yeah it might be a big mistake
There's a charge in my heart
That I'm willing to take
Slow your motor down
Hey you know you've gotta rewind
I need the twenty minutes back
To the front of the line
I slip and fall into anticipation
Twisted fascination yeah
I'm not in over my head 'cause you're outta your mind
You've got me electrified
Every little thing and all the time
You've got me electrified
Shock me once you shock me twice
You've got me electrified, oh shock it
Over my head 'cause you're outta your mind
You've got me electrified
Every little thing all the time
You've got me electrified
Shock me once you shock me twice
You've got me electrified
You've got me baby, you've got me yeah
Here we go, here we go now
You've got me electrified
You've got me electrified
Yeah baby, shock me baby
[Incomprehensible]
