

My Secret Place

[Joni Mitchell](#)

I'm going to take you to my special place
It's a place that you like no one else I know might appreciate
I don't go there with anyone but you're a special case
For my special place, my special place
My secret place, for my secret place, for my secret place
People talk to tell you something or to take up space
Guess I'm only talking to be talking to your pretty face
I don't talk much to anyone
But you're a special case
For my special place, my special place
I was born and raised in New York City
I'm just getting used to Colorado, oh street bravado, carry me
Why did you bring me to a place so wild and pretty?
Are there pigeons in this park, muggers after dark
In these golden trees, in my secret place?
In my secret place, secret place
I'm going to take you to my special place
It's a place no amount of hurt and anger can deface
I put things back together there
It all falls right in place
In my special space, my special place
