

# Girls & Pills

## Flickerstick

Forget yourself for a day  
And all your friends keep tellin you  
That I'm dying  
Well, I'm thinking about surviving Now you're floating away  
I know your name I know your face like a stranger  
But I'm liking the taste of the danger So leave  
And I can sell you out I like the girls  
Who like the pills  
The ones that cure  
The ones that kill I like the girls  
Who like the pills I'll take my share of the blame  
I smell your cigarettes  
Your sex and your violence  
But your love and hate  
Is louder than silence And all you want is the fame  
The voice is free  
But soon you'll be buying And tv cameras  
Know that you're lying So leave  
And I can sell you out I like the girls  
Who like the pills  
The ones that cure  
The ones that kill I like the girls  
Who like the pills I like the girls  
Who like the pills  
The ones that cure The ones that kill  
(I like the girls who...) I like the girls Who like the pills  
(I like the girls who...) I like the girls  
Who like the pills The ones that cure  
The ones that kill  
(always forever...together) I like the girls  
Who like the pills I like the girls  
Who like the pills  
The ones that cure The ones that kill  
(always forever...together) I like the girls  
Who like the pills I like the girls  
Who like the pills  
The ones that cure  
The ones that kill  
(always forever...together) I like the girls

Who like the pills I like the girls  
Who like the pills  
The ones that cure  
The ones that kill  
(I like the girls who...) I like the girls  
Who like the pills
