They're All About You

Shane Yellowbird

Songs come on my radio
Some are fast and some are slow
Some about sunshine, some about rain
But to this old heart they sound the same
Even though the notes and words might change

They're all about you
Those kisses underneath the stars
You
They're all about you

Late at night in this big old bed
A million thoughts runnng through my head
Sometimes I can't even sleep
Your memory won't let me be
And even if I drift off to sleep

They're all about you
I close my eyes and all see is
You
Yeah you're the star of every scene
You
They're all about you

Conversations all begin with "Hey, what's up?" and
"How ya been?"
But by the time they end (They're all about you)
Revelations late at night, wishes tossed up in the sky
Best moments of my lfe (They're all about you)

You
Its dosen't matter what it is
You
Oh, its a fight that I can't win
They're all about you
Every scene and every song (They're all about you)
Girl the list goes on and on (They're all about you)
Every night, girl every dream (They're all about you)
Every thought and everything

They're all about you
They're all about you
They're all about you
