

# Weed With Willie

[Toby Keith](#)

I always heard that his herb was top shelf  
I just could not wait to find out for myself  
Don't knock it til' you tried it, Well I tried it my friend  
And I'll never smoke weed with Willie again I learned a hard lesson in a small Texas town  
He fired up a fat boy and passed him around  
The last words that I spoke before they tucked me in  
Was I'll never smoke weed with Willie again I'll never smoke weed with Willie again  
My parties all over before it begins  
You can pour me some old whiskey river my friend  
But I'll never smoke weed with Willie again I hopped on his old bus, the Honey Suckle Rose  
The party was Vegas it was after the show  
Alone in the front lounge with just me and him  
With one parting puff grim creeper set in I'll never smoke weed with Willie again  
My parties all over before it begins  
You can pour me some old whiskey river my friend  
But I'll never smoke weed with Willie again Now we're passing the guitar and telling good jokes  
I know ones a-comin' cause I'm smelling smoke  
No I do not partake, I just let it pass by  
With a smile on my face and a great contact high I'll never smoke weed with Willie again  
My parties all over before it begins  
You can pour me some old whiskey river my friend  
But I'll never smoke weed with Willie again In the fetal position with drool on my chin  
I messed up and smoked weed with Willie again
