Always A Place

The Hooters

There is always a place
Some say that it's heaven
Where someday we'll find
Some kind of escape
But one thing I know
We find it together
As long as you're there
There is always a place

A faraway land,
A desert oasis
An island of sun
In a forest of rain.
Don't need to look far
Just into your smile
As long as you're there
There is always a place.

And if there's always we can run to
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on,
There is always a place - always
There is always a place - always. Yeah

There is always a place,
When I am way beyond lonely,
With nothing to hide,
And nothing to prove
There is always a space,
That's there for me only
I know deep inside,
The place is with you.

There is never a time
To question our feelings
There is hardly a word,
That seems out of place
We'll find our way home,
We find it together-

As long as you're there
There is always a place

And if there's always we can run to
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on,
There is always a place - always

Uhh and if there's always we can run to
There's always a place we belong
And if there's always a dream, it can only come true
As long as we keep holding on,
There is always a place - always
There is always a place - always
There is always a place - always
That's good.
