

Lifetimes

Van Morrison

You sit in silence and the river answers
And I have loved you many, many years
I saw you standing by the wondrous river
And I have come today to calm your fears Those lifetimes
So many lifetimes with you The boatman singin' far across the water
What is this feelin' in my heart and soul
The nighttime angel spreads her wings around me
And I feel the sadness and the river flows Those lifetimes
So many lifetimes with you Listen to the music inside
That is all that you have to do
Listen to the music inside
Can't you hear what it says to you? And I shall get to know you in these lifetimes
In awe and wonder on down through the years
The nighttime angel spreads her wings around me
I feel the silence and my doubts are cleared Those lifetimes
So many lifetimes with you Listen to the music inside
That is all that you have to do
Listen to the music inside
Can't you hear what it says to you? Listen to the music inside
That is all that you have to do
Listen to the music inside
Can't you hear what it says to you?
