

White Lights

We Are Monroe

Verse:

long nights surfing through the scene,
looking for that lim-light, I'll never hold you back
waking on the shore line, deep in the sun,
taking in the real life, I'll never hold you down

Chorus:
lifting you straight off from the ground,
knowing that I'm the only one

holding you up for all to see
thinking that I would never leave

Bridge:
you know there's only ever one way out

you know there's only ever one way

you know there's only ever one way out

you know there's only ever one way

you know there's only ever one way out

Verse:
taking on the late nights, hanging off the rim
soaking up the moon-light, you never see me go

every time you hold back breaking the fall

seated for the long haul, life moves on

Chorus:
and I'm lifting you straight off from the ground,

knowing that I'm the only one

holding you up for all to see

thinking that I would never leave

lifting you straight off from the ground,

knowing that I'm the only one

holding you up for all to see

thinking that I would never leave

Outro:
I had you all night feeding the call,

setting the easy by making it feel like you got soul,

making it feel like you got sold the ride to get you high enough making it feel like you got soul

making it feel like you got soul

making it feel like you got soul

making it feel like you got soul
