

# India

## Kids of 88

I got the biggest part of heaven in my life  
And I can feel it every time I see your eyes  
You're my world, you're my light

India

If I could, you know I'd open every door  
But your own journey makes it mean so much more  
I believe in all your dreams

India

Down, you'll never let me down  
When you follow your own way  
Speak the words only you would say  
Keep reaching for your star  
It won't be far  
When love's behind you  
You're the miracle of life that love has made  
This bond between the two of us will never break  
Your flower blooms, I sing for you  
India

You hold the universe inside your little hands  
So don't you listen if they just don't understand you  
When you try, you always fly

India

Yes, baby  
Keep reaching for your star  
If won't be far  
I'm right behind you  
You, yeah

I got the biggest part of heaven in my life  
And I can feel it every time I see your eyes  
You're my world, you're my light

India

I believe in all your dreams

India

When you try, you always fly  
India, yes, you do, baby
