

Other Side of Darkness

Decyfer Down

Don't look the snake in the eyes falling under his spell
He'll cut you down at the knees and leave you lost and for dead
Don't you fall into what seems so beautiful Open up your eyes and see through this hollow
World that justifies the hole left inside yourself
Don't be the next in line tasting the sorrow
Bring what is dead inside back out into the light
The light from the other side of darkness I've been there just like you
I too was searching for more
Overturning stones looking for answers never satisfied (satisfied!)
Open up your eyes and see through this hollow
World that justifies the hole left inside yourself
Don't be the next in line tasting the sorrow
Bring what is dead inside back out into the light Back into the light
The light from the other side
Open up your eyes
Open up your eyes and see through this hollow
World that justifies the hole left inside yourself
Don't be the next in line tasting the sorrow
Bring what is dead inside back out into the light
The light from the other side of darkness The other side of
The other side
The other side of darkness
