April 2031

Warrant

They say the sky used to be blue I don't quite believe it

It's probably always been the color that it is

And there were cotton candy clouds and birds to fly through it

Just stories we all love to tell our kidsSo I'll close my electronic door and keep the cold outside

Hug my aluminium pillow so tight

And pray the radiation doesn't make me sick tonightThere used to be a wind wasn't caused by fans

I wonder how it would of felt in my hair

And the nuclear ring around the moon was caused by man

If it was then it's much to late to careSo I'll put my saftey goggles and gaze out at the sun

The artificial atmosphere machines give off a constant hum

In a world thats cold and peaceful April 2031No more sky and no more trees

(April 2031)

No more oxygen to breathe (April 2031)

No more hate and no more war (April 2031)

Nothing left worth fighting for 2031As far back as Vietnam we should of learned our lesson But we closed our eyes and sent our son's away

And they told us we were winning as they sold more ammunition

Some were angry most just looked the other wayOhh, nights illuminated by the endless glowing sand

That swallowed all the oceans and choked off all the land

In a world beyond resuscitation even by God's handNo more moutains no more sea

(April 2031)

No more you and no more me

(April 2031)

No more music no more songs

(April 2031)

No God left to blame it on

(April 2031)No more children playing April 2031

No more need for praying April 2031

No more children playing April 2031

No more need for praying April 2031
