Stone

Cibo Matto

She's got a living stone and rain in her hand
She doesn't have an umbrella to cover herself
She's got a living stone and pain in her mind
All I can do is sing for her and myselfI wish I can take it away to three thousand light years away
I wish I can take it away to three thousand light years away
Don't be afraid, I'll be next to youI wish I can take it away to three thousand light years away
I wish I can take it away to three thousand light years away
I wish I can take it away to three thousand light years away
I wish I can take it away to three thousand light years awayI'll be next to you
