

Erasmus (feat. Klayton)

Subculture

I can't take another complication
Have mercy please God erasmus
I can't take another complication
Have mercy please God erasmus Let me breathe check destroy and upset
On focusing distractions tear me open
All the thoughts in my head are constantly haunting me
I hope that I don't bore you while I whine about it
I hope you won't be saddened while I cry about it
I keep telling myself that there's something more
I keep telling myself that there's something more
I'm lost in this place it's such a waste
I can't watch things further complicate
So if it all fails just throw it back in my face and bury me I can't take another complication
Have mercy please God erasmus
I can't take another complication
Have mercy please God erasmus Everyday I wake up to stagnant bullshit
As soon as I escape there's more stagnant bullshit
This endless propaganda corporate agenda
I'd like to think there's more something more
I hope that I don't bore you while I whine about it
I hope you won't be saddened while I cry about it
So if it all fails just throw it back in my face and bury me I'm lost in this place it's such a waste
I can't watch things further complicate Have mercy please God erasmus
Have mercy please God erasmus
I can't take another complication
Have mercy please God erasmus
Have mercy please God erasmus
I can't take another complication I can't take another complication
Have mercy please God erasmus
I can't take another complication
Have mercy please God erasmus
