

# All These Shapes

## The Pop Ups

What can you make with all these shapes? Triangle magnet on my fridge

are you an egyptian pyramid  
a mountain large against the sky  
or a sign to yield as we walk by  
maybe a ramp that we can jump  
pointy goatee beard of a punk  
a megaphone so we can chat

or a happy birthday party hat What can you make with all these shapes? little square magnet on my fridge

if we tip you over just a smidge  
you could be a diamond till you land  
or a box of pizza for the band  
you could be a window or a tooth  
a cd case for sonic youth  
a button on some weird machine

a picture frame or a saltine What can you make with all these shapes? little circle magnet on my fridge

just like a baseball we could pitch  
round as an eye that you could wink  
or a head filled with a brain that thinks  
could be a planet or the moon  
a floating helium balloon  
maybe a wheel to steer a car

or the top of a big 'ol pickle jar SHAPES! triangle on top of square  
makes a nice house who lives in there?

triangle can be a cap,  
when your circle needs a hat

I wonder what it I see

when I combine and use all three??? these magnets stuck on the fridge door they really show me so much more  
that shapes are everywhere I look! they're on our walls they're in our books!  
they're in the eyes we use to see they make up you they make up me!!
