Way Out

[Shannon Noll](#)

You're surrounded by
The friends and all the places
The smiles and all the faces
You don't recognise
You've been abandoned by
The ones with all the answers
The balances and the transfers
Give you peace of mind
And all I can say
Is I'll try everything
To get through to you
Chorus:You've got walls I'll never climb
You're in a place I'll never find
And even when you're getting close
You're further every time
You've got walls I'll never climb
You're in a place I'll never find
And even when you're getting close
You're further every time
You're in a place I'll never find
So you are leaving on
A plane with good intentions
Sayin' that we'll be friends
And talk real soon
You are guarded by
A love that never landed
You're crossing the Atlantic
But there's no room
And all I can say
Is I'll try everything
To get through to you
ChorusYou've got walls I'll never climb
You're in a place I'll never find
So give up what's surrounding you
And let me get inside
You're in a place I'll never find
