

# Mind Drive

## Yes

(anderson/squire/white/howe/wakeman)

Don't forget to seek out the world

If you want to stay [stake out]

Your actions speak much louder than words

And you get to realize

Just as long as you have control

Holding the fire

Just as long as you can control

This point of your desire

Great days, it will all come to you [wait as it will ...]

Feel another future response [feel it as a...]

You get the heaven you like

You get the heaven

You get the heaven you need

You get to heaven now

Just as long as you bring the power

From the inside

Just as long as you hold the key

From the inside

Ascend and create

Ascend and create

Ascend and create

Ascension

They will bring you rain

They will move the sky

They will give you light

It will lift you long [it will live you long.]

To the eyes of child

To the song of songs

It will bring the moon

It will transfer you

Whole [home]

Pushing for the time to call

Dancing on the moon

Giving it out [digging it out]

In the night of nights

It will shine for you

With the wings of flight

It will make it through

To the eyes of child [through the eyes...]

And the test of song

It will comfort you

It will make you feel

Whole

Looking for the chance to call

Making the world

Independently

Whole

Watching for the place to run

Dancing, dancing, move

We will make it right

We will dance for you

On this night of nights

They will make it through

Through the eyes of child

And the wish you are

As the thought that comes

From a distant star

Whatever thoughts you have

Can become a new dream

For the perfect stance

Take you there and back again

And you believe you are

Independently whole

Waiting for the signs, whole [home]

Reaching for the farside show

Whole

Dancing for the moon

Dancing for the light

Whole

Pushing for the mind drive

Dancing for the hour [earth]

Dancing for the light

Whole

Dancing for the light

They will bring the rain

They will make it right

It will transfer you

Each and every night

With her wings of hope

They will cover you

They will make it right

They will shine for you

With the golden wings  
Close around your soul  
It will count for you  
It will make you whole  
To the eyes of child [through the eyes...]  
And the song of songs  
It will make you move  
It will transfer you  
And so it comes to this now  
When you walk into the bliss that  
Holds down the fire  
As pleasure will divide [divine]  
So close, so let your heart enter  
Succumb and let your heart enter this [so come, and let...]  
So close, and let yourself lose control  
Heaven help the love that you send  
Heaven has the love you send.  
Reeeeeeeea \_ lly [breathe]  
Whole  
Watching for the time to call  
Dancing in the light  
Making it right  
Dancing  
Dancing  
Whole  
Waiting for the signs  
Whole [home]  
Reaching for the sight to show  
Whole  
Independently  
Whole  
Pushing for the mind drive  
Dancing on the out [earth]  
Dancing in the light  
They will bring the rain  
They will shine the light  
Understanding this  
It can come tonight  
For the love of love  
And the answers, too  
It begins with me  
It begins with you  
Whole  
Wishing for the time to call  
Looking for the sign

Making it right  
Dancing  
Dancing  
Whole  
Waiting for the time to call  
Dancing in the harmless sun  
Entering the mind drive  
Don't forget to seek out the world  
If you want to stake out  
Actions speak much louder the words [than words]  
And you get to realize  
Just as long as you have control  
Holding the fire  
Just as long as you get to keep  
This point of your desire  
When tense, it will come to you [wait as it will come to you]  
Fear of the future response [feel it as a future response]  
You get the heaven you like  
You get to heaven  
You get the heaven you need  
You get to heaven now
