Don't just sit there and stare at me
Don't just sit there and watch me bleed
I'm losing you and you, you're losing me I'm tired of what we are
I'm tired of all the pain
I'm losing you and you, you're losing me Face lies flat, I see my reflection
Download thoughts
But your files are corrupted Don't just sit there and stare at me
Don't just sit there and watch me bleed
I'm losing you and you, you're losing me I'm tired of what we are
I'm tired of all the pain
I'm losing you and you, you're losing me
You, you're losing me Time stands still and you're frozen in motion
I held down your escape
But you're crashing, you're crashing Don't just sit there and stare at me
Don't just sit there and watch me bleed
I'm losing you and you, you're losing me I'm tired of what we are
I'm tired of all the pain
I'm losing you and you, you're losing me Don't just sit there and stare at me
Don't just sit there and watch me bleed
I'm losing you and you, you're losing me I'm tired of what we are
I'm tired of all the pain
I'm losing you, we're losing
We're losing, we're losing
