

# How Much Does The World Weigh

Tracy Byrd

Sat up thinking late last night  
Do they have a way to count the stars  
There's a lot of scientific minds  
They claim to know what all the answers are  
But that's the case How much does the world weigh  
Somebody's probably worked it out  
You could look up what all the experts say  
But all you got to do is look around  
You'll be surprised to notice  
Ask that girl that trying to make the rent  
Pay the bills and feed the kids  
Six months ago there daddy walked away  
Ask that man whose family stayed around  
When he finally put the bottle down  
Now he fights that battle everyday  
How much does the world weigh The Human spirit is a funny thing  
How far it bends before it breaks  
And to keep the world from folding in How much strength does it take  
Well don't ask me Ask that couple in the waiting room  
The doctors say its still too soon  
Its their little girl All they can do is pray  
Ask that little boy who's gotta choose  
Mom or Dad either way he'll lose  
Breaking up and he thinks he's to blame  
How much does the world weigh Ask that man who's hanging on the cross  
His last breath would save the lost  
The answers in the tears on his face [Repeat: x3]  
How Much does the world weigh
