

Fall Down (Joe Bishara Remix)

Godhead

All these days filled with grief and darker craze (greys)
Are consumed by me and everything I do just makes it darker And I fall down
Face into the ground you see I threw it all that we should be
But you just save it All this waste that I destroyed all in haste seems to haunt me now
And everything that I do just makes it clearer
And all my life through the darkness and the strife you surrounded me
And everything that you do just makes it brighter And I fall down, face into the ground you see
I threw it all that we should be but you just save it all
And I fall down
And I fall down
And I fall down, face into the ground you see
I threw it all that we should be but you just save it all
And I fall down, you pick me up and now you see I destroyed all we should be
But you just save it all
