Don't Get Caught

EUFONIX

Don't let them stop you believing
Don't let them find you breathing
You've gotta have a place in the back of the aisle
And the bus has gone out all evening

I sleep with the chief or the leaders
In my old clothes, I lay there just dreaming
My thought are off somewhere, But I'm going nowhere
But don't let them catch you sleeping

Don't get caught

They might lock you down there forever
And you have to keep it together
Just because one day you've done it your own way
You made all the other workers jealous

The sun wakes you up in the morning
And now all the gates need securing
Now don't waste my time, now you've caught the first line
But don't them catch you yawning

Don't get caught

Don't get caught in the crossfire
Just cause you felt tired today
You're sleeping on barbwire
You don't need to get fired away

Don't get caught
