Where Did You Go

Paul Renna

All the lights were dim
There was nobody home
And I have so much to give
But the moment was lost
And thats where it endCounting dreams within
All the sleepless nights
Has my life worn thin
When the moment gets lost
Thats where it endHey you where did you
I need you I must know
Hey you where did you
Where did you go
Where'd you goAs the days roll by
I just needed you more
I remember those eyes
When the moment gets lost
Thats where it lies
All I see is your face
With each passing of time
Its all that I can take
When the moment gets lost
Its all that remainsHey you where did you go
I need you I must know
Hey you where did you go
Where did you go; you goEveryday love surrounds your heart
But now that I have found you I fall apartHey you where did you go
I need you I must know
Hey you where did you go
Where did you go; you go
